ENGLISH FOR THE ENVIRONMENT SECTOR

LANGUAGE TRAINING FOR THE ENVIRONMENT SECTOR

Learnwell prides itself in being able to offer its students and prospective clients with a wide variety of specialist language courses. To add to our ever growing list of courses we would like to offer existing and prospective customers a course on the environment. The course is aimed at environmental professionals who wish to improve their understanding of environmental issues in English. The course aims to broaden student knowledge of environmental terminology and vocabulary as well as improve confidence when discussing the environment in English.

The course aims will be met through a combination of written and verbal tasks, case studies of relevant Baltic issues, discussion and student interests and materials. The course will be led by Peter Byrne who graduated from Manchester and Joensuu Universities in the field of Environmental Management. Peter has also taught courses in Sound environmental practice for business and industry at North Karelia Polytechnic.

PETER BYRNE

I originate from Manchester in the UK and I have lived in Finland for the past ten years. During that time I have studied at Joensuu University as part of my degree studies at Manchester University. I have worked as a teacher of English for the duration of my stay here in Finland.

5 Years self employed and teaching adults in companies such as, Sampo, Borealis, fortum, S.E.B, SOK, Altia Finnlines, Amerpap, Nordea, HKL, Puolustusvoimat and Telia-Sonera to name a few.

I love teaching and seeing my students skills develop. I'm outgoing, approachable and always willing to listen to your concerns and help in any way I can.

I recently completed the yleinen kielitutkinto at level 3 and am able to use Finnish as a support language if needed. My free time is occupied by a passion for photography and cycling.

NEW! All students studying English with Learnwell receive a free copy of the newspaper Helsinki Times delivered to their home each Thursday throughout the course.
